**CORSA® PERFORMANCE RELEASES CAT-BACK EXHAUST
FOR 2014 SIERRA/SILVERADO PICKUPS**

BEREA, Ohio – CORSA® Performance is releasing a premium stainless-steel exhaust system for the 2014 5.3L Chevy Silverado/GMC Sierra 1500. The new CORSA Cat-Back system is designed to enhance pickup truck enthusiasts' driving experience by delivering noticeable performance gains, an aggressive exhaust note and a guaranteed drone-free ride.

Featuring CORSA's Sport sound level, the exhaust system will be available as a single side exit (part numbers 14871-14874) or as a dual rear exit design (part numbers 14867-14870). Each system comes with either CORSA polished stainless steel 4.0-inch diameter Pro-Series Tips or black PVD-coated tips, laser etched with the CORSA logo. PVD, physical vapor deposition, technology is a vacuum coating process that vaporizes solid metal to a plasma of atoms or molecules, and is applied as a high-performance coating to harden, coat and enhance an objects durability. CORSA's PVD-coated Pro-Series Tips display a deep, brilliant, reflective, black finish that won't chip, flake or peel, and resists corrosion.

Available for any cab and bed configuration ranging from 119-inch to 153-inch, the new CORSA Cat-Back exhaust system for the Chevy Silverado/GMC Sierra 1500 features CORSA's exclusive patented Reflective Sound Cancellation® (RSC®) technology, which delivers a crisp, acoustically tuned exhaust note while eliminating in-cabin drone. The Cat-Back exhaust system is manufactured in the U.S.A. from premium stainless steel and is 50 state emissions legal. Complete installation hardware and

instructions are included and a limited lifetime warranty protects the exhaust for the life of the vehicle.

About CORSA Performance

CORSA® Performance, a TMG Performance Products brand, headquartered in Berea, Ohio, is a leading manufacturer of premium exhaust systems and air intakes for cars, trucks and SUVs. Through advanced engineering and a relentless drive to deliver cutting-edge products, CORSA Performance offers some of the industries most advanced exhaust and air intake systems.
